“Be the change that you want to see in the world.”

Summary

I am a senior software engineer at Milwaukee Tool and founder of Fraculation LLC. Currently I am building full-stack applications in C# and React with a focus on clean architecture and maximum feature velocity. I have 9 years of professional experience and have been writing code since 2010. My experience is varied, starting with full stack development in C#, Angular, AWS, and Azure, then learning real-time application development in C# and Rust, and later leading the development of a real-time financial dispute resolution platform built with dotnet core.

Expert in C#, Terraform, Dotnet Core, Typescript, and Unity. Currently learning Neovim and Rust. Looking to solve complex and meaningful problems with a team that values autonomy and creativity. Ideally working in performance-critical and/or high scale contexts on the Individual Contributor track.

Skills

Backend

- C#, dotnet core
- SQL, Entity Framework
- Rust, Axum, HTMX
- Test Driven Development
- Python, NodeJs

Frontend

- React, Angular
- Typescript
- Jasmine, Jest, Karma
- Cypress
- Tanstack Query, Router, Table

DevOps CI/CD

- Github Actions
- Terraform, Docker
- AWS SDK
- Integration/Api Testing
- Azure Devops

Work Experience

Milwaukee Tool

SENIOR SOFTWARE ENGINEER

Milwaukee, Wisconsin (Remote)

Dec. 2024 - Current

- Directed development of novel integraton with an internal application including distributed transactions.
- Increased backend logic coverage by designing integration tests around a dotnet api.
- Led backend design, taking responsibility for backend design decisions on the team.
- Improved testing methodology by introducing Stubs in lieu of some Mocks.
- Skills: C# • React • Tanstack Query, Router, Table • SQL Server • Integration testing • Clean Architecture

Dispute.com

LEAD SOFTWARE ENGINEER

Milwaukee, Wisconsin (Remote)

Feb. 2023 - Sept. 2024

- Architected and developed secure, scalable systems resulting in 90% reduction in time spent on manual intervention in the core data pipeline.
- Onboarded and led a team of 3 developers towards a culture of communication and excellence.
- Introduced Auth0 for client authentication and authorization, automated management via Terraform.
- Directed development of a greenfield React application, encouraging best practices such as unit testing and component reuse.
- Created extensible system to manage integrations with CRMs and Chargeback Protection platforms (Konnektive, Sticky, Ethoca, Verifi)
- Created CI/CD pipelines in GitHub Actions which deployed applications via Terraform and released internal shared Nuget and NPM packages.
- Skills: C# • Github Actions • React • Rust • App Service • SQL Server • Durable Functions • Application Insights • Entra Id/AAD

Fraculation LLC

GAME DEVELOPER, FOUNDER

Milwaukee, Wisconsin

Sep. 2021 - Present

- Used C# to implement a true-to-life Mendelian genetics system which faithfully recreates Punnet Square outcomes.
- Achieved high performance, processing 10,000s of entities every 10ms on consumer hardware as part of a tower defense game.
- Autogenerated C# API from an OpenAPI specification with openapitools for use in Unity.
- Created open-source libraries leading to a 60% reduction in code duplication across game jams.
- Built leaderboard API in Rust using Axum, Serde, HTMX, Sqlx, and Tokio.
- Skills: Unity • C# • Rust • Real-time parallel algorithms • Data-oriented Design • ECS • DOTS • Jobs • Burst Compiler

Flite Golf & Entertainment

UNITY IMPLEMENTATION SPECIALIST

Milwaukee, Wisconsin (Remote)

Sep. 2022 - Feb. 2023

- Provided company-wide guidance on C# and Unity best practices as the resident Unity expert.
- Introduced unit tests to an untested codebase.
- Introduced Azure Application Insights to capture logs across all facilities and deployments, decreasing time collecting logs in the field.
- Managed client relationships with the owner and employees of Luxe Golf, which hosted our applications.
- Led towards a culture of documentation by creating standardized test cases, a knowledge base, and an onboarding guide.
- Skills: Unity • C# • QA Process Improvement • Azure App Insights

Centare (Milwaukee Tool, One Key)

Milwaukee, Wisconsin

AWS CLOUD ENGINEER

Jan. 2021 - Jun. 2021

- Used CQRS and Event Sourcing to build an ETL pipeline from SQL Server into Elasticsearch, ingesting millions of positional data points per day
- Learned AWS Lambda and the Kinesis Consumer Library in Python to build a serverless data pipeline
- Skills: Python • Terraform • Docker • C# • AWS Lambda • DynamoDB • Kinesis

Centare (Symplr Cactus)

Milwaukee, Wisconsin

FULL STACK ANGULAR DEVELOPER

Sep. 2019 - Dec. 2020

- Modernized existing web applications into Angular Single Page Applications.
- Onboarded two offshore teams to work inside the new project ecosystem.
- Mentored junior team members through pair programming and code reviews.
- Skills: Angular • Typescript • RxJS • Cypress • C# Web API • Agile

Centare (API Healthcare)

Milwaukee, Wisconsin

CLOUD ENGINEER, ANGULAR APPLICATION DEVELOPER

Aug. 2017 - Sep. 2019

- Converted legacy C# on-premise modules to run on the Azure cloud.
- Managed automated build and deployment in Jenkins.
- Documented and led design decisions for Angular applications.
- Onboarded new team members to support Angular applications by creating a knowledge base and one-on-one mentoring

MSOE

Milwaukee, WI

B.S. IN SOFTWARE ENGINEERING

Projects

L-System Language Execution Engine

Fraculation LLC

[HTTPS://WWW.FRACULATION.COM/BLOG/LINDENMAYER-IMPLEMENTATION](https://www.fraculation.com/blog/lindenmayer-implementation)

Dec. 2020 - Jun. 2023

- A custom implementation of L-Systems including a tokenizer and a multithreaded interpreter.
- Built with Unity's Jobs system to enable multithreading, and rendered in Unity as Meshes.
- Presented at M+Dev in 2022.
- Experimented with Rust interoperability in Unity to improve performance.
- Skills: Unity • C# • Rust • Developer Tooling • Library development • Jobs • Burst Compiler • Multithreading • Performance Optimization

The Essence of Tactics

Pirate Software Jam 15

[HTTPS://LIMEBLOSSOMJAMS.ITCH.IO/THE-ESSENCE-OF-TACTICS](https://limeblossomjams.itch.io/the-essence-of-tactics)

Jul. 2024, 14 days

- Built a Tile-Tactics game with a game designer and artist, building on shared code from a previous jam.
- Created pathfinding and optimizing AI based on a custom fitness function.
- Skills: C# • Data-driven design • Test driven development • AI • Library development

Leaderboard web app

Fraculation LLC

[HTTPS://GITHUB.COM/DSMILLER95/FRACULATION-LEADERBOARD](https://github.com/dsmiller95/fraculation-leaderboard)

Apr. 2024

- Created a web app with Rust and HTMX to store leaderboards of games I created.
- Allowed equivalent display of data between HTML and JSON MIME types without code or endpoint repetition.
- Skills: Rust • Axum • HTMX • Api development • SQL, SQLx

Splendor Simulator

Hobby

[HTTPS://GITHUB.COM/DSMILLER95/SPLENDORSIMULATOR](https://github.com/dsmiller95/splendor-simulator)

Dec. 2022

- Designed a Python application to train an AI to play the board game Splendor.
- Allowed display of game states during training with a Flask API and a React frontend.
- Partially completed migration of game logic to Rust to increase performance, binding to Python with pyo3/Maturin.
- Skills: Python • Pytorch • Flask • React • Rust • Pyo3 • React • Api development

Disconnect

Top 3%, GMTK Jam 2023

[HTTPS://SPIKEVELOPS.ITCH.IO/DISCONNECT](https://spikevelops.itch.io/disconnect)

Jun. 2023, 48 hours

- Coordinated team of 3 software developers to rapidly collaborate without conflicts on a 48-hour timeline.
- Created a game with 0 logic bugs at launch through Test-Driven development when creating both game logic and AI.
- Skills: Leadership • Test driven development • C#
